

START ALERT 376 LEARNING GRANT MARKET INTERACTIVE MAP AND DASHBOARD USER GUIDE

BACKGROUND

Funding from the START Network for a market assessment carried out from June – August 2020 allowed CRS, consortium partners, and the larger response community in Uganda to understand, improve, and better execute market-based programming in areas prone to natural disasters in Uganda.

INTERACTIVE MAP OF POTENTIAL SERVICE PROVIDERS

A mapping exercise was conducted to identify and map key local and regional markets, vendors, financial service providers and mobile money companies that are willing to participate in market-based distribution modalities in the future should disasters break out in the assessment areas. The results from the mapping exercise, including contact information on the vendors consulted, are shared in the interactive map via the URL link <https://arcg.is/Le4zX> using the login details in Table 1.

POWER BI DASHBOARD

In order to facilitate learning and make the assessment information more accessible to other humanitarian actors, CRS has developed a visualization of some of the quantitative data gathered from vendors and households which is available via a dashboard through the link shared below using the login information in Table 2.
